

LabTech Hotplate Surfaces

LabTech EH and EG HotPlates are designed to meet laboratory daily heating requirements. Their unique features include different digital temperature controllers and anticorrosion or stainless steel heating surface. They are excellent solutions for heating digestion, evaporation and acid distillation, and fully satisfy the requirements of different labs.

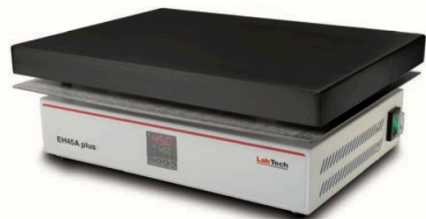

LabTech offers a wide range of different HotPlates surface materials, in order to face different laboratory needs.

- **Aluminum with PTFE coating**
- **Max 200 °C**

EH Series

- **Graphite heating surface**
- **Max 450 °C**

EH45 Series

- Aluminum alloy with PTFE coating
- From 200 °C to 350 °C

EG Series

- Graphite with PTFE coating
- Max 370°C

EG Series

- Graphite with PTFE coating
- Wireless remote control
- From 200°C to 450°C

S Series
